

1) I am constantly trying to improve and showcase my organisational and leadership qualities, and that is why I want to join the Board of SEDS India.

I would rate myself 7.5 out of 10, because though I am good at organisation and communication, I lack in time management, on which I am constantly improving now.

2) I am good in communication and it has been a great asset to myself, so it will also be an asset to SEDS India. I can get along with people quickly and I'll be the board's aide in establishing new chapters and also maintaining cordial relationships with the existing ones.

3) SWOT Analysis:

Strengths: Communication, getting to know the depth of the things that I do and if possible teaching or aiding people in learning things.

Weakness: Mainly time management, which usually occurs due to procrastination.

Opportunities: Getting to know people from aerospace and space industries and startups, collaborating in projects with different people from different parts of the country.

Threats: My grades are falling and I have to correct them so the time that I would spend for SEDS would be less.

4) In the next five years, every chapter which is under SEDS India (both newly inducted ones and existing ones) should know the rules and regulations of SEDS and about it and its working, the documentation involved in it. Every year or alternative year, one of the chapters should conduct a Space Conclave. So as a Secretary, I will first bring transparency in the board and within chapters. According to me this is the first and foremost one that should be done.

5) As I said earlier, bringing transparency in the system of SEDS India, i.e, within the board and within the chapters and between chapters and board is my main priority and my first work as the Secretary of SEDS India. So, in this I should avoid giving special care to my SEDS chapter and shouldn't be lazy at doing work. I should also avoid problems in documentation, such as problems in membership and abnormalities in members list from the chapters.
