SEDS INDIA ELECTIONS 2018

Questionnaire for AT-LARGE

1. **How well do you understand your responsibilities as a position holder? Justify with an answer**

   The responsibility of the position holder is not being like the normal member which make the person to work not like the other members make them to work double or even more than that. This attitude of the person can make a good thought in all also helps in achieving success. The main thing which I have learnt from my college is to take responsibility if you are willing it will not approach you. The responsibility is the duty which is assigned to the person but in my view, everyone must to take it if they can do it.

2. **What changes you want to make in an organization such as SEDS to make it pan India and how do you plan to contribute to it**

   First, I will make sure about the reach of the SEDS all over Indian colleges and universities which helps to know about the reach of SEDS among the students.

   Secondly making sure about the future requirement for the other SEDS chapter which helps them to organise events locally.

   Concentrating more on project make students to be encouraged also conducting idea events helps the person to deliver their idea who are not able of developing their own project without any assistants.

3. **How much time will you be able to spare for your job as SEDS India position holder?**

   There is no time to be required for the thing which we are passionate towards it make us to work all time when it required. If the we are working in the passionate environment then time is nothing a matter to work on.

4. **What are your strengths and weaknesses that make you stand out in a crowd?**

   STRENGTH:
   - ✓ Ability to manage team and can be able to work with my views which will be beneficial.
   - ✓ Flexible attitude towards the team.
   - ✓ Dedicated.

WEAKNESS:

- ✓ Easily tempered.

5. How will your personality (strengths and weaknesses) help you in your job? Justify

From the past year I had been the part of SEDSKCT which help to improve my strength in the situation which we have faced had enabled me to have a great experience from my seniors which helps me learn many things from them. They act as a guide to improve my qualities also they teach me what they feel as weakness in me and advised me to overcome it. More over my clear view about the work help me examine my ideas to them and my flexible attitude help me with good interaction with my colleagues.

6. What are your technical expertise? How do you plan to make SEDS outreach as well as SEDS projects a pan India movement?

Good in software like Arduino, C and Python also interested in designing which made to learn Fusion 360, Adobe Photoshop and learning about these more to be an expertise person.

Implementing new events like idea competitions which helps the student which boost the members to give their ideas who are not able to apply the idea on their own also conducting project expo. Making a tie ups and good relationship with other SEDS chapters and with great companies and with great person like research peoples, scholar etc, who are interested in.

7. How do you plan to raise funding for various activities that happen in SEDS projects/ outreach?

Signing MOU with some companies who can make their favour to our organization which helps to increase the new project development also the good outcome project is to be awarded with the Internship chances from the company.

If any of the project is successful it must be documented and certified and then it must be developed as a product and to be marketed all over.

Fixing a mandatory amount for the members will also help to increase the funding

8. Tell five different competitions SEDS India could participate in the upcoming year?

- ARSSDC- International Design Competition (www.arssdc.org)

- Call for Ideas: 2018 NOVA DESIGN AWARD "Future Living Space" (https://www.archdaily.com/895522/call-for-ideas-2018-nova-design-award-future-living-space)
- MARS CITY DESIGN - The Innovation Platform for Creating Cities on Mars (https://www.marscitydesign.com/competition-2018)
- Project Mars – An International Art and Film Contest (http://www.projectmarscompetition.com/index.html)
- FLY YOUR IDEAS 2019 – (https://www.airbus-fyi.com/)

9. Case study:

Two different chapters under the SEDS India board want to conduct a similar experiment in their respective colleges. As a person you are aware of the fact that your college is better in the facilities for the experiment but you cannot be biased. How do you find a way out? How do you allocate resources? And if you are cutting one of the experiments, how do you justify?

For any of the position holder it will be a tough time to decide but everything must be solved by the position holder because he is the responsible person for it. Now as per my concern I will be insisting the two team to have an official meet and presentations about the experiment before the panel members and then according to the result the SEDS will provide the resources to them if the experimenting team is very clear about the idea and then they are heading towards the goal will get the maximum resources. If suppose the two team are good enough to compete each other I will combine the two teams and ask them to work together to reach the common goal.

PREPARED BY,

SATHISH KUMAR S V

EXECUTIVE – TECH (SEDSKCT)
